

TECHBlue Research

Waterfront Project Data – Historical and benchmarked data collected from waterfront construction reviews.

Examples: Property site plans, waterfront development site plans

Industry Studies – Surveys and summaries on the impact of sustainable waterfront practices.

Examples: Clean marina and clean waterfront reviews (Fishermen’s Cove, FL)

Blue Papers – Industry and trade specific information for sustainable waterfront applications.

Examples: Site and water body specific analysis of sustainable waterfront development (Off-street parking requirements for marina development, Jacksonville, FL)

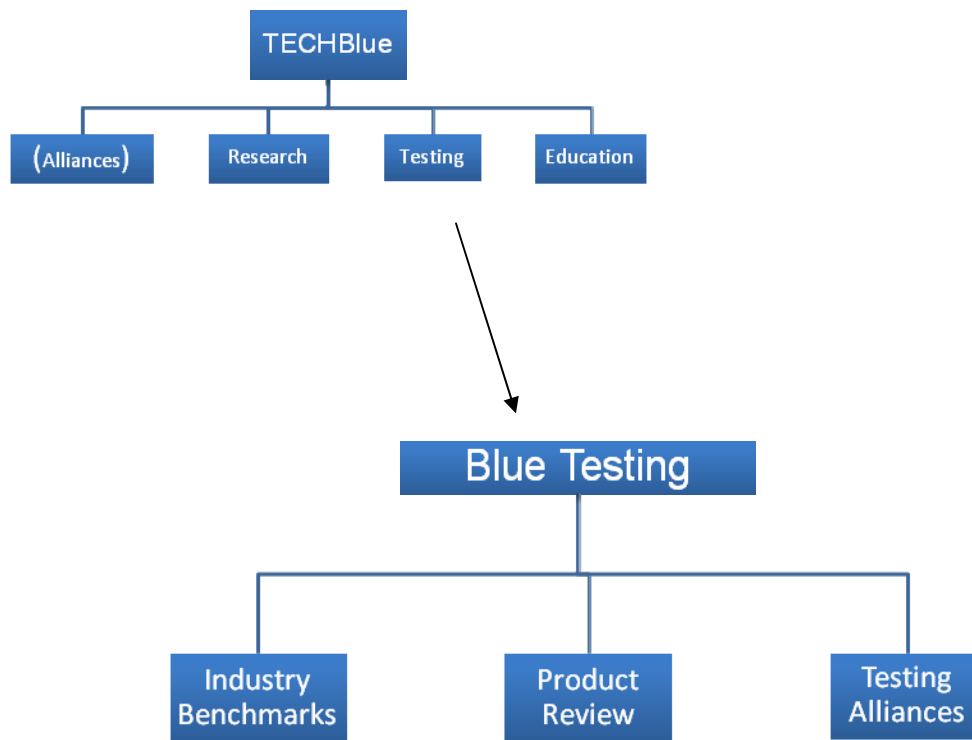

EMS Templates – Industry and trade specific training for sustainable waterfront applications. Environmental Management Systems, Best Management Practices, Purchasing Guidelines

Examples: Templates and checklists for property owners, contractors, and supply chains (The Beach House, Jacksonville Beach, FL)

TECHBlue Testing

Reviewed by

TECHBlue Center

Industry Benchmarks – Historical and current waterfront testing data as it relates to the study of sustainable and clean waterfronts.

Examples: Flotation testing, ASTM verification, Warranty standards, Industry life-cycles

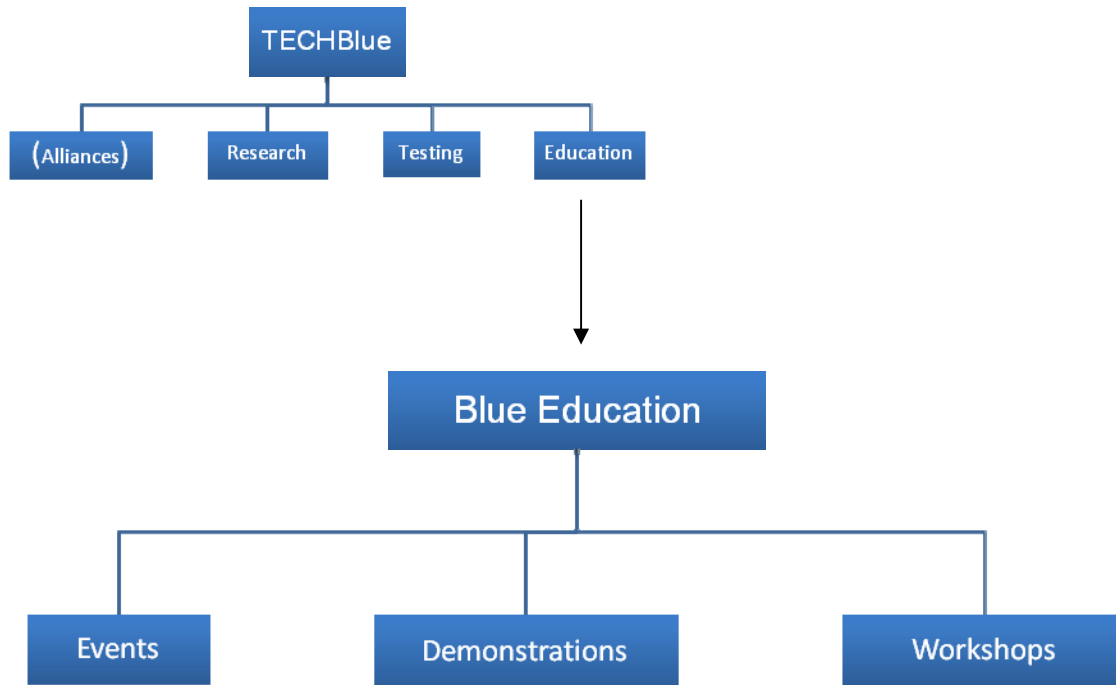

Product Review – Product reviews by type of application and impact on the waterfront.

Examples: Conformance to Construction Specification Institute (CSI) format, Recyclable content, Warranty confirmation

Testing Alliances – Industry specific testing for clean waterfront applications. Facilitate testing protocols for waterfront products.

Examples: Solar and water conservation effectiveness for property owners – Backyard Living, Jacksonville, FL

TECHBlue Education (Applications)

Events – Nonprofit and community waterfront events.

Examples: Recycling collection points, Marina Day KIDS, Product display open houses

Demonstrations – On-site and off-site waterfront specific showcase of sustainable and clean waterfront applications.

Examples: Sustainable waterfront library. Outdoor showroom, Waterfront homeowner applications, Waterfront destination projects

Workshops – Industry and trade specific training for sustainable waterfront applications. Promote interdisciplinary teaching and environmental study.

Examples: Funding Green Buildings Workshop, Green Marine Summit, On-going sustainable product workshops.
